end of life advice

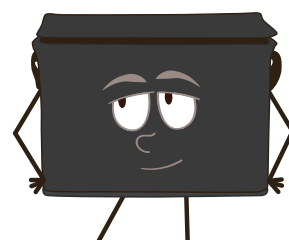

This cooler bag is mainly made from rPET, a fabric created from recycled plastic bottles, while the foil lining is certified Food Safe.

Wherever possible we have changed the materials of the accessories to reduce their environmental impact.

We hope this cooler has a long and useful life, but when it's over, recycle it with other plastics.

Typically, bags like this can be recycled into bottles, carpet, clothing, cups, food containers, and trays.

THE STORY OF rPET: PROGRESS IN THE MAKING
