

**ASSESSMENT REPORT PROPOSAL IN COMPLIANCE WITH REACH**

We have been commissioned by the client to conduct REACH compliance assessment on their products (Contract No.: TR20165453). We have assessed the client's product under the European Regulation (EC) No 1907/2006 (hereinafter referred as REACH Regulation), including product categories, substances list, SVHC (Substances of Very High Concern) as well as the client's responsibilities and obligations for this product under REACH Regulation. The results of the assessment and our proposals are described as follows:

1. Client's Information

Name:	Bagco Asia Ltd.
Address:	Suite 1902 Tamson Plaza, 161 Wai Yip Street, Kwun Tong, Kowloon
Name of the contact person:	Kiki Ng
Tel:	+852-25262771
Fax:	+852-25260107
Email:	kiki@bagcoasia.com

2. Product Identification

Product name:	Pembury PU
Tyre/ model:	N/A
Physical appearance/colour:	Solid/ Black
Product type:	Article

3. Product Substances Information**3.1 Substance on its own or in mixtures**

Index	Substance name	CAS No.	EC No.	Tone
N/A	N/A	N/A	N/A	N/A

3.2 Substance in article intended to be released

Index	Substance name	CAS No.	EC No.	Tone
N/A	N/A	N/A	N/A	N/A

3.3 SVHC (Substance of Very High Concern) in article (Details see Annex 1)**4. Responsibilities and Obligations****4.1 Registration**

4.1.1 The manufacturer "Bagco Asia Ltd." sells the product "Pembury PU" to non-EU "Bags" manufacturers. It is the "Bags" which is placed in the EU market and falls into the scope of REACH Regulation.

According to the definition in Article 3(3), Chapter 2, Title I, the "Bags" is regarded as "Article" under

REACH Regulation.

4.1.2 The Pembury PU, as an integral part of Bags, other than a mixture in a special container, is not intended to be released under normal and reasonable foreseeable conditions of use.

Therefore, the Pembury PU will not trigger the obligation of registration according to Article 7(1), Chapter 2, Title 2 of REACH Regulation.

4.2 Notification

The concentrations of the SVHCs defined in Article 57 of REACH Regulation in Pembury PU are all lower than 0.1% weight by weight (w/w), which is likely to result in even lower concentrations of those SVHCs in Bags. Therefore the Pembury PU will not trigger the obligation of notification according to Article 7(2) under REACH Regulation.

Note: On 10 September 2015, European Court of Justice (ECJ) made a ruling regarding REACH Regulation that each single article rather than an assembled article is the reference for the identification of substances of very high concern (hereinafter referred as "SVHC"). So the testing result obtained when assembled article is the reference for SVHC testing cannot be applied to such identification and will be invalid after the ruling.

4.3 Information Communication down the Supply Chain

The concentrations of the SVHCs are lower than 0.1% weight by weight (w/w) in Pembury PU and possibly even lower in Bags, thus the Pembury PU will not trigger the obligation of communicating information down the supply chain in accordance with Article 33.

4.4 Others

4.4.1 Authorisation

Since the manufacture of Pembury PU and Bags is based outside the EU, and the lifecycle of related substances outside EU is irrelevant with respect to REACH Regulation, there is no obligation of authorisation required for both Pembury PU and Bags.

4.4.2 Restriction

The directive on marketing and use of dangerous substances 76/769/EEC have been repealed since 1 June 2009, and our client should follow the restriction conditions outlined in Annex XVII in REACH Regulation from then on.

As we haven't received any testing request of Restricted Substance from our client, the detail of restricted substance in the product is unknown.

5. Assessment Conclusions

According to the product information provided by our client and related Articles of REACH Regulation, we draw the conclusion that:

- 1) The "Bags" which are placed in the EU market and falls into the scope of REACH Regulation;**
- 2) "Bags" are comply with the definition of article (Article 3(3)) and the "Pembury PU" supplied by our client is its integral part, Thus the "Pembury PU" will not trigger further obligations under REACH Regulation about SVHC as it currently stands.**

6. Proposal for REACH Compliance

6.1 The client should inform his downstream users that the products mentioned above comply with REACH Regulation as soon as possible.

6.2 The client should pay constant attention to the SVHCs in the candidate list and the restricted substance in the annex XVII, Also need to fulfil related obligations if necessary. This list may be updated regularly and it is important to monitor any changes to it.

6.3 The client should ensure the products are consistent with the sample provided to Chemical Inspection & Regulation Service Limited.

STATEMENT

First: Instruction for the assessment conclusion

The above assessment conclusions that we have made is based on the understanding and analysis of the consignor's product and REACH regulation and only applies to the situation described in the report. This conclusion does not apply to any enterprise or product that fails to meet the description.

As parts of REACH regulation (for example Annex XIV) are still under modification, the above conclusion only applies to REACH regulation as it currently stands.

This report is only used to assist the consignor to know his own responsibility and obligation under REACH Regulation, and provide the actors in his supply chain with evidence that his products are in compliance with REACH regulation.

The consignor should study this report carefully. If there is any doubt or suggestion, please contact us and we will do our best to clarify and include any necessary amendments.

Second: Disclaimer Statement

We undertake no responsibility and no obligation to verify the authenticity of information supplied by the consignor.

The client should ensure the exported products are consistent with the sample provided to our company in material, vendors and production process. We can't be held responsible or bear any consequence which may result from differences between the sample products provided to us and the exported products.

We have completed this report with all professional competence, responsibility and reasonable due diligence, however due to the limited approach to the consignor, the products and the market we can't guarantee that the content of the report is fully accurate.

Consignor should make a cautious decision to adopt the assessment conclusion of this report. We assume no liability for any loss incurred as a result of the use of the conclusion.

Third: Privacy statement and others

This report has been completed by us independently. We guarantee that we shall not disclose information in the above report to any third party (except with the express written permission of consignor). We shall assume no responsibility for any loss caused by disclosure of the report.

We suggest that before offering the report the consignor should sign a security agreement with the third party in order to keep the information of consignor and products in the report from disclosure.

Remarks:

1. Test parts may be single material or a variety of materials which could not be divided by physical ways. Unless otherwise noted, components of base material, coating metal, coating paint and/or colouring

pigment were no longer divided, but tested as one whole.

2. All results are applicable only to the test samples.

3. Unit: mg/kg. 1000mg/kg= 1000ppm= 0.1%

4. N.D. = Not detected (<MDL), MDL= Method Detection Limits, MCV= Maximum Concentration Values.

5. The substances are tested by in-house methods: CIRS-TC-SVHC001, CIRS-TC-SVHC002, CIRS-TC-SVHC003, CIRS-TC-SVHC004, CIRS-TC-SVHC005 and CIRS-TC-SVHC006 which refer to the methods listed below:

6. *: Be covered by index number 650-017-00-8 in Annex VI, part 3, table 3.1 of Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures:
(70*) Aluminosilicate Refractory Ceramic Fibres
 - a) oxides of aluminium and silicon are the main components present (in the fibres) within variable concentration ranges
 - b) fibres have a length weighted geometric mean diameter less two standard geometric errors of 6 or less

micrometres (μm)

c) alkaline oxide and alkali earth oxide ($\text{Na}_2\text{O}+\text{K}_2\text{O}+\text{CaO}+\text{MgO}+\text{BaO}$) content less or equal to 18% by weight (71*) Zirconia Aluminosilicate Refractory Ceramic Fibres

a) oxides of aluminium, silicon and zirconium are the main components present (in the fibres) within variable concentration ranges

b) fibres have a length weighted geometric mean diameter less two standard geometric errors of 6 or less micrometres (μm).

c) alkaline oxide and alkali earth oxide ($\text{Na}_2\text{O}+\text{K}_2\text{O}+\text{CaO}+\text{MgO}+\text{BaO}$) content less or equal to 18% by weight.

7. ** (Items 81, 82, 83, 84) [with $\geq 0.1\%$ of Michler's ketone (EC No. 202-027-5) or Michler's base (EC No. 202-959-2)] is identified as a substance meeting the criteria of Article 57 (a) of Regulation (EC) 1907/2006 (REACH) owing to its classification as carcinogen category 1A or 1B
